

Knock-down rate: 63%

Lanes: **1.** HeLa cells transfected with Renilla Luciferase esiRNA (RLUC, Cat.No. EHURLUC) as negative control. **2.** HeLa cells transfected with ABL1 esiRNA (Cat.No. EHU141291).

Quantitative-Immunoblotting: Lysates were separated on SDS-Page and probed with mouse anti-c-Abl (1:2000) Clone: ABL-148 (Cat.No. A5844) and goat anti-GAPDH (1:7000) (Acris) antibodies. The signal intensities of indicated bands were quantified using an Odyssey infrared imaging system (Li-COR) and normalized to the GAPDH signal. At 72h post transfection, a 63 % ABL1 protein reduction was measured between the negative control RLUC and the sample treated with ABL1 esiRNA.
