

### Knock-down rate: up to 76%

**Lanes:** 1. HeLa cells transfected with Renilla Luciferase esiRNA (RLUC, Cat.No. EHURLUC) as negative control. 2. HeLa cells transfected with ILK esiRNA (Cat.No. EHU143271).

**Quantitative-Immunoblotting:** Lysates were separated on SDS-Page and probed with mouse anti-ILK (1:1000) Clone: 65.1 (Cat.No. I0783) and goat anti-GAPDH (1:7000) (Acris) antibodies. The signal intensities of indicated bands were quantified using an Odyssey infrared imaging system (Li-COR) and normalized to the GAPDH signal. At 72h post transfection, a 43% and 76% ILK protein reduction was measured between the negative control RLUC and the sample treated with ILK esiRNA.
